Technical data:

	COMAX BoCo 330
Material	Al
Material thickness	0,7 mm
Effective width of shingle	330 x 330 mm
Consumption in m ²	9,18 pcs
Minimum pitch	22°
Packing (box)	22 pcs = 2,396 m ²

ALUMINIUM SHINGLES **COMAX BoCo 330**

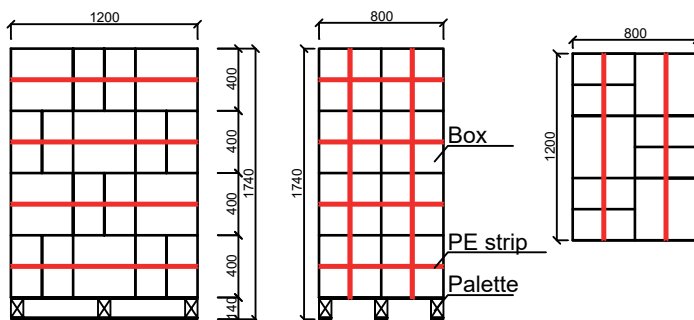

The classic shape of sheet metal shingles is suitable for roofs and façades of modern and romantic buildings of all purposes and sizes. These may be both, small garden buildings and chateaus or sports halls.

The obliquely oriented square shingle is a historically proven universal shape of the small-format shingle and resembles fish scales. **BoCo 330** is an evolution of this shape. It is not just about the material, but about the finish and touch-ups as well. The machine treatment made the production more precise, less expensive, and enabled a new way of fitting the roofing. The **COMAX BoCo 330** shingle is fitted using a single system stainless steel clip in its upper corner, making the roofing measurement easy and precise. Together with the retaining clip in the bottom corner, it contributes to the compact design of the roofing. Smooth unembossed BoCo shingles can be shaped and adapted to the pitch of the roof or facade section. Besides the classic cylindrical areas, domes, and towers, **COMAX BoCo 330** is suitable for roofing convex and concave surfaces.

The appearance of the designer roofing is largely determined by the surface colour and texture. This is where **COMAX ROOFS®** offers architects and project planners a wide range of possibilities thanks to the coil-coating line.

PACKING - **COMAX BoCo 330**

- Packed in cardboard boxes, box dimensions 400 x 200 x 400 mm
- Shingles amount per box: 22 pcs
- Boxes amount per pallet: 48 pcs
- Total amount of shingles per pallet: 1056 pcs / 113,5 m²
